

WELDINGS 3,8 cm

SAFETY AREA

a safety margin of (minimally) 5cms from the edge of the layout. Essential elements of the layout (logos, text) should be contained within the safety area

ATTENTION!

DOUBLE-SIDED PRINTS

in case of double-sided prints, it is advised to apply a wider safety margin (depending on the tunnel / welding width) to avoid undesirable displacement of layout elements within the recto / verso joins.

PRINTFILE PREPARATION:

scale 1:1

file format: TIFF, PDF

CMYK colours

no bleed

file resolution – depending on the size of the final product
